HAIR REJUVENATION

- EVERYTHING YOU NEED TO KNOW -

30 MILLION WOMEN AND 50 MILLION SUFFER FROM EXCESSIVE HAIR LOSS
According to an estimate, 30 million women and 50 million suffer from excessive hair loss. If you are worried about the hair loss, then we are here to help you with our effective hair rejuvenation treatments.

- Hair loss affects both male and females. Treatment protocols are available for both male pattern and female pattern baldness.
- Male pattern baldness or the progressive thinning of the scalp has a large genetic factor, and reduction in hair follicle size is affected androgenic hormones.
- Hair loss in men starts at the age of 20 years, and by the age 50, over 50% of the men are affected.

**CHOOSE FROM CARBOXYThERAPY, PRP, PRP ULTRA, PRP ULTRA PLUS, AND STEM CELL THERAPY.**

REGROW YOUR HAIR AND CONFIDENCE WITH NO PAIN, NO SURGERY, AND NO SIDE EFFECTS.

- www.larc.pk -
Carboxytherapy Treatment is a non-surgical procedure which involves the injection of small amounts of Carbon Dioxide gas into the scalp. This stimulates new blood supply production and helps in repairing the damaged hair cells. This is an effective treatment when combined with proper scalp and hair hygiene products.

PRP Treatment

Platelet Rich Plasma therapy is also used to treat hair loss. This process involves the withdrawal of patient blood, processing so that the enriched cells (platelet-rich plasma) remain and it is injected into the scalp of the person. PRP has different growth factors that stimulate hair growth. We are able to offer different types of PRP where the concentration of the growth factors can be increased anytime between 4 and 20 times. We are proud to present the Dr USA PRP kit which has one of the world’s highest growth factor extraction rate. Speak to our doctors about PRP, PRP Ultra and PRP Ultra Plus treatment.
Why choose London Aesthetics?
